

VOLUME XIII.

SUBJECT INDEX.

A

Address.

Annual — by the President, Robert W. Hunt, 32.

Aggregates.

Tests of Mortars Made from Wisconsin —. M. O. Withey, 834.

Tests of Natural Concrete —. R. S. Greenman, 828.

Alloys.

Lead-Tin-Antimony and Tin-Antimony-Copper —. William Campbell, 630. Discussion, 666.

Non-Ferrous Metals and —. Report of Committee B-2, 206.

American Society for Testing Materials.

Officers and Members of the Executive Committee of the —, 1116.

Annual Meeting.

Summary of the Proceedings of the Sixteenth —, 9.

Antimony.

Lead-Tin- — and Tin- — -Copper Alloys. William Campbell, 630. Discussion, 666.

Apparatus (see also Sieves).

Method and — for Determining Consistency. Cloyd M. Chapman, 1045. Discussion, 1052.

Asphalt (see also Paving Mixtures).

Coal-Tar and — Products for Waterproofing. S. T. Wagner, 955. Discussion, 959.

Atlantic City Steel Paint Tests.

—. Report of Sub-Committee D of Committee D-1, 369.

Autoclave.

Results Obtained with the — Tests for Cement. H. J. Force, 740. Discussion, 751.

Automatic Screw Stock.

See **Screw Stock.**

Axles.

Standard Specifications for Cold-Rolled Steel —, 156.

A

B

Bars.

Condensed Report of the Investigation of Reinforcing — Rerolled from Steel Rails, conducted under Instructions from Sub-Committee V, on Steel Reinforcing —, of Committee A-1, W. K. Hatt. Appendix II, Report of Committee A-1, 96.

Bars (Continued):

- Standard Specifications for Electrolytic Copper Wire —, Cakes, Slabs, Billets, Ingots and Ingot —, 218.
- Standard Specifications for Extra-High-Carbon Steel Splice —, 139.
- Standard Specifications for High-Carbon Steel Splice —, 135.
- Standard Specifications for Lake Copper Wire —, Cakes, Slabs, Billets, Ingots and Ingot —, 214.
- Standard Specifications for Medium-Carbon Steel Splice —, 131.
- Standard Specifications for Rail-Steel Concrete Reinforcement —, 153.

Bearing Metals.

- Study of — and Methods of Testing. T. D. Lynch, 699. Discussion, 712.

Bearings.

- Spherical —. Mont Schuyler, 1004.

Bessemer.

- Tentative Specifications for Cold-Drawn Steel: — Automatic Screw Stock, 191.

Billets.

- Standard Specifications for Blooms, — and Slabs for Carbon-Steel Forgings, 166.
- Standard Specifications for Electrolytic Copper Wire Bars, Cakes, Slabs, —, Ingots and Ingot Bars, 218.
- Standard Specifications for Lake Copper Wire Bars, Cakes, Slabs, —, Ingots and Ingot Bars, 214.

Bituminous Paving Mixtures.

- See **Paving Mixtures.**

Blasting.

- Suggestions as to Standard Specifications to Promote Efficiency and Safety in Explosives Used in —. C. P. Beistle, 1108.

Blooms.

- Standard Specifications for —, Billets and Slabs for Carbon-Steel Forgings, 166.

Boiler Tubes.

- Results of Tests of Welded —. E. L. Lasier, 606.

Brick.

- Proposed Standard Specifications for Building —, 286.
- Proposed Standard Specifications for Paving —, 289.
- Standard Specifications for —. Report of Committee C-3, 282. Discussion, 301.

Bridge.

- Inspection of the Havre de Grace —. Report of Sub-Committee B of Committee D-1, 332.
- Test of a 40-foot Reinforced Concrete Highway —. D. A. Abrams, 884.

Building Brick.

- See **Brick.**

C

Cakes.

- Standard Specifications for Electrolytic Copper Wire Bars, —, Slabs, Billets, Ingots and Ingot Bars, 218.
Standard Specifications for Lake Copper Wire Bars, —, Slabs, Billets, Ingots and Ingot Bars, 214.

Carbon Steel.

- Heat Treatment of Hypo-Eutectoid — Castings. J. H. Hall, 514. Discussion, 525.
Magnetic Criteria of the Mechanical Properties of a One-per-cent- —. Charles W. Burrows, 570.
Proposed Recommended Practice for the Heat Treatment of Case-Hardened — Objects, 188.
Standard Specifications for Blooms, Billets and Slabs for — Forgings, 166.
Standard Specifications for Extra-High- — Splice Bars, 139.
Standard Specifications for High- — Splice Bars, 135.
Standard Specifications for Medium- — Splice Bars, 131.
Standard Specifications for Wrought Solid — Wheels for Electric Railway Service, 160.

Case-Hardened Objects.

- Proposed Recommended Practice for the Heat Treatment of Case-Hardened Carbon-Steel Objects, 188.

Castings.

- Heat Treatment of Hypo-Eutectoid Carbon-Steel —. J. H. Hall, 514. Discussion, 525.

Cast Zinc.

See **Zinc**.

Cement (see also Concrete, Mortars).

- Action of Various Substances on — Mortars. Richard K. Meade, 813. Discussion, 821.
Estimation of Fine Particles in — by Rate of Hydration. H. S. Spackman, 714. Discussion, 737.
Results Obtained with the Autoclave Tests for —. H. J. Force, 740. Discussion, 751.
Standard Specifications and Tests for Clay and — Sewer Pipes. Report of Committee C-4, 302.
Standard Specifications for —. Report of Committee C-1, 221.
Thermal Activities of Portland — during the Period of Setting. Louis N. Beals, Jr., 720. Discussion, 737.

Chinese Wood Oil.

See **Wood Oil**.

Clay.

- Standard Specifications and Tests for — and Cement Sewer Pipes. Report of Committee C-4, 302.

Coal.

- Standard Specifications for —. Report of Committee D-5, 458.

Coal Tar (see also **Paving Mixtures**).

— and Asphalt Products for Waterproofing. S. T. Wagner, 955. Discussion, 959.

Coatings (see also **Paint**).

Preservative — for Structural Materials. Report of Committee D-1, 329.

Cold-Drawn Steel.

Standard Specifications for —. Report of Committee A-8, 190. Discussion, 195.

Tentative Specifications for — : Bessemer Automatic Screw Stock, 191.

Tentative Specifications for —: Open-hearth Automatic Screw Stock, 193.

Cold-Rolled Axles.

See **Axles**.

Committee Reports.

Committee A-1 on Standard Specifications for Steel, 58. Discussion, 169.

Appendix I. Proposed Changes in Present Standard Specifications for Steel, 67.

Appendix II. Condensed Report of the Investigation of Reinforcing Bars Rerolled from Steel Rails, conducted under Instructions from Sub-Committee V, on Steel Reinforcing Bars, of Committee A-1. W. K. Hatt, 96.

Appendix III. Report of the Investigation of Wrought Steel Wheels, conducted under the Direction of Sub-Committee VII, on Rolled Steel Wheels and Steel Tires, of Committee A-1, 126.

Committee A-2 on Standard Specifications for Wrought Iron, 183.

Committee A-4 on Heat Treatment of Iron and Steel, 188.

Committee A-8 on Standard Specifications for Cold-Drawn Steel, 190. Discussion, 195.

Committee A-10 on Hardness Tests, 196.

Committee B-1 on Standard Specifications for Copper Wire, 198. Discussion, 205.

Committee B-2 on Non-Ferrous Metals and Alloys, 206.

Committee C-1 on Standard Specifications for Cement, 221.

Committee C-2 on Reinforced Concrete, 223.

Appendix. Report on Concrete and Reinforced Concrete adopted by the Joint Committee on Concrete and Reinforced Concrete, November 20, 1912, 224.

Committee C-3 on Standard Specifications for Brick, 282. Discussion, 301.

Committee C-4 on Standard Specifications and Tests for Clay and Cement Sewer Pipes, 302.

Committee C-6 on Standard Tests and Specifications for Drain Tile, 303.

Committee C-7 on Standard Specifications for Lime, 313. Discussion, 320.

Committee Reports (Continued):

Committee D-1 on Preservative Coatings for Structural Materials, 329.

Sub-Committee B on Inspection of Havre de Grace Bridge, 332.

Appendix. Reports of Inspection of Havre de Grace Bridge by Various Railroads, 341.

Sub-Committee C on Paint Vehicles, 350.

Appendix I. Detail Results of Tests of Soya Bean Oils and Tung Oils, 355.

Appendix II. Specifications for Turpentine, 365.

Sub-Committee D on Atlantic City Steel Paint Tests, 369.

Sub-Committee E on Linseed Oil, 372.

Sub-Committee F on the Definition of Terms Used in Specifications, 402.

Sub-Committee J on the Testing of White Paints, 406.

Committee D-4 on Standard Tests for Road Materials, 448. Minority Report, 450. Discussion, 454.

Committee D-5 on Standard Specifications for Coal, 458.

Committee D-8 on Waterproofing Materials, 459.

Committee D-11 on Standard Specifications for Rubber Products, 466.

Committee E-1 on Standard Methods of Testing, 469.

Committee E-5 on Regulations Governing the Form but not the Substance of Specifications, 470.

Committee E-6 on Papers, 472.

Appendix. Regulations Governing Papers, — and Discussions, 474.

Executive Committee, 38.

Concrete (see also Cement, Mortars).

Reinforced —. Report of Committee C-2, 223.

Report on — and Reinforced — adopted by the Joint Committee on — and Reinforced —, November 20, 1912. Appendix, Report of Committee C-2, 224.

Standard Specifications for Rail-Steel — Reinforcement Bars, 153.

Test of a 40-foot Reinforced — Highway Bridge. D. A. Abrams, 884.

Tests of Natural — Aggregates. R. S. Greenman, 828.

Tests of Reinforced — Slabs under Concentrated Loading. A. T. Goldbeck, 858. Discussion, 874.

Conservation.

— and Shipping Containers. B. W. Dunn, 1072. Discussion, 1098.

Consistency.

Method and Apparatus for Determining —. Cloyd M. Chapman, 1045. Discussion, 1052.

Containers.

Conservation and Shipping —. B. W. Dunn, 1072. Discussion, 1098.

Copper.

Lead-Tin-Antimony and Tin-Antimony — Alloys. William Campbell, 630. Discussion, 666.

Standard Specifications for Electrolytic — Wire Bars, Cakes, Slabs, Billets, Ingots and Ingot Bars, 218.

Copper (Continued):

Standard Specifications for Lake — Wire Bars, Cakes, Slabs, Billets, Ingots and Ingot Bars, 214.

Copper Wire.

Standard Specifications for —. Report of Committee B-1, 198. Discussion, 205.

Corrosion.

Tests of the Rate of — of Metals. A. W. Carpenter, 617. Discussion, 625.

D**Definitions.**

Definition of Terms Used in Specifications. Report of Sub-Committee F of Committee D-1, 402.

Proposed Standard — of Terms Used in Paint Specifications, 403.

Drain Tile.

Standard Tests and Specifications for —. Report of Committee C-6, 303.

E**Electric Railway Service.**

Standard Specifications for Wrought Solid Carbon-Steel Wheels for —, 160.

Electrolytic Copper.

See **Copper**.

Executive Committee.

Annual Report of the —, 38.

Explosives.

Suggestions as to Standard Specifications to Promote Efficiency and Safety in — Used in Blasting. C. P. Beistle, 1108.

Extractor.

— for Bituminous Paving Mixtures. C. N. Forrest, 1069.

F**Failures.**

Rail — and Their Causes. M. H. Wickhorst, 582. Discussion, 594.

Fine Particles.

See **Particles**.

Forgings.

Standard Specifications for Blooms, Billets and Slabs for Carbon-Steel —, 166.

Form.

Regulations Governing the — but not the Substance of Specifications. Report of Committee E-5, 470.

G**Gage.**

Use of the Strain — in the Testing of Materials. W. A. Slater and H. F. Moore, 1019. Discussion, 1039.

H

Hardness.

— Tests. Report of Committee A-10, 196.

Resistance of Steels to Wear in Relation to Their — and Tensile Properties. George L. Norris, 562. Discussion, 568.

Havre de Grace Bridge.

See **Bridge.**

Heat Treatment.

Effect of Size of Section on Physical Properties Developed by —. J. H. Nead, 489. Discussion, 525.

— of Hypo-Eutectoid Carbon-Steel Castings. J. H. Hall, 514. Discussion, 525.

— of Iron and Steel. Report of Committee A-4, 188.

Influence of Mass in the — of Steel. K. W. Zimmerschied, 510. Discussion, 525.

Mechanical Tests of Heat-Treated Spring Steel. R. P. Devries, 550. Discussion, 561.

Proposed Recommended Practice for the — of Case-Hardened Carbon-Steel Objects, 188.

Highway Bridge.

See **Bridge.**

Hydration.

Estimation of Fine Particles in Cement by Rate of —. H. S. Spackman, 714. Discussion, 737.

I

Ingots.

Standard Specifications for Electrolytic Copper Wire Bars, Cakes, Slabs, Billets, — and Ingot Bars, 218.

Standard Specifications for Lake Copper Wire Bars, Cakes, Slabs, Billets, — and Ingot Bars, 214.

Inspection.

— of Havre de Grace Bridge. Report of Sub-Committee B of Committee D-1, 332.

Iron.

Heat Treatment of — and Steel. Report of Committee A-4, 188.

Oxygen in — and Steel: Value of Existing Methods for Its Determination. W. R. Fleming, 477. Discussion, 487.

Standard Specifications for Wrought —. Report of Committee A-2, 183.

Standard Specifications for Wrought — Plates, 185.

L

Lake Copper.

See **Copper.**

Lead.

— -Tin-Antimony and Tin-Antimony-Copper Alloys. William Campbell, 630. Discussion, 666.

Lime.

Proposed Standard Specifications for —, 315.

Standard Specifications for —. Report of Committee C-7, 313. Discussion, 320.

Linseed Oil.

— Report of Sub-Committee E of Committee D-1, 372.

Standard Specifications for the Purity of Raw — from North American Seed, 399.

M**Machines.**

See **Testing Machines.**

Magnetic Criteria.

— of the Mechanical Properties of a One-per-cent-carbon Steel. Charles W. Burrows, 570.

Mass.

Influence of — in the Heat Treatment of Steel. K. W. Zimmerschied, 510. Discussion, 525.

Mechanical Properties (see also **Physical Properties, Tensile Properties**).

Magnetic Criteria of the — of a One-per-cent-carbon Steel. Charles W. Burrows, 570.

Mechanical Tests.

See **Tests.**

Metals.

Notes on the Property of Toughness of —. Albert F. Shore, 612.

Study of Bearing — and Methods of Testing. T. D. Lynch, 699. Discussion, 712.

Tests on the Rate of Corrosion of —. A. W. Carpenter, 617. Discussion, 625.

Methods of Testing (see also **Testing, Tests**).

Method and Apparatus for Determining Consistency. Cloyd M. Chapman, 1045. Discussion, 1052.

Standard —. Report of Committee E-1, 469.

Study of Bearing Metals and —. T. D. Lynch, 699. Discussion, 712.

Mortars.

Action of Various Substances on Cement —. Richard K. Meade, 813. Discussion, 821.

Tests of — Made from Wisconsin Aggregates. M. O. Withey, 834.

N**Non-Ferrous Metals** (see also **Antimony, Copper, Lead, Tin, Zinc**).

— and Alloys. Report of Committee B-2, 206.

O**Oil.**

Detail Results of Tests of Soya Bean Oils and Tung Oils. Appendix I, Report of Sub-Committee C of Committee D-1, 355.

Oil (Continued):

- Linseed —. Report of Sub-Committee E of Committee D-1, 372.
- Standard Specifications for the Purity of Raw Linseed — from North American Seed, 399.
- Testing of Chinese Wood —. E. W. Boughton, 923. Discussion, 942.

Open-hearth.

- Tentative Specifications for Cold-Drawn Steel: —Automatic Screw Stock, 193.

Oxygen.

- in Iron and Steel: Value of Existing Methods for Its Determination. W. R. Fleming, 477. Discussion, 487.

P**Paint (see also Preservative Coatings).**

- Atlantic City Steel — Tests. Report of Sub-Committee D of Committee D-1, 369.
- Outline of a Test for Indicating the Relative Priming and Top-Coat Values of Different Paints. M. McNaughton, 947. Discussion, 954.
- Vehicles. Report of Sub-Committee C of Committee D-1, 350.
- Proposed Standard Definitions of Terms Used in — Specifications, 403.
- Testing of White Paints. Report of Sub-Committee J of Committee D-1, 406.

Papers.

- . Report of Committee E-6, 472.
- Regulations Governing —, Committee Reports and Discussions. Appendix, Report of Committee E-6, 474.

Particles.

- Estimation of Fine — in Cement by Rate of Hydration. H. S. Spackman, 714. Discussion, 737.

Paving Brick.

See **Brick.**

Paving Mixtures (see also Asphalt).

- Extractor for Bituminous —. C. N. Forrest, 1069.

Physical Properties (see also Mechanical Properties, Tensile Properties).

- Effect of Size of Section on — Developed by Heat Treatment. J. H. Nead, 489. Discussion, 525.

Pipes.

- Standard Specifications and Tests for Clay and Cement Sewer —. Report of Committee C-4, 302.

Plates.

- Standard Specifications for Wrought-Iron —, 185.

Portland Cement.

See **Cement.**

Preservative Coatings (see also Paint).

- for Structural Materials. Report of Committee D-1, 329.

President's Address.

See **Address.**

Priming Values of Paints.

Outline of a Test for Indicating the Relative Priming and Top-Coat Values of Different Paints. M. McNaughton, 947. Discussion, 954.

Proposed Specifications.

See **Specifications**.

R**Rails.**

Condensed Report of the Investigation of Reinforcing Bars Rerolled from Steel —, conducted under Instructions from Sub-Committee V, on Steel Reinforcing Bars, of Committee A-1, W. K. Hatt. Appendix II, Report of Committee A-1, 96.

Rail Failures and Their Causes. M. H. Wickhorst, 582. Discussion, 594.

Standard Specifications for Rail-Steel Concrete Reinforcement Bars, 153.

Recommended Practice.

See **Specifications**.

Refractories.

Testing of —. A. V. Bleininger, 967.

Regulations.

— Governing Papers, Committee Reports and Discussions. Appendix, Report of Committee E-6, 474.

— Governing the Form but not the Substance of Specifications. Report of Committee E-5, 470.

Reinforced Concrete.

See **Concrete**.

Reinforcement Bars.

Condensed Report of the Investigation of Reinforcing Bars Rerolled from Steel Rails, conducted under Instructions from Sub-Committee V, on Steel Reinforcing Bars, of Committee A-1, W. K. Hatt. Appendix II, Report of Committee A-1, 96.

Standard Specifications for Rail-Steel Concrete —, 153.

Resistance to Wear.

Resistance of Steels to Wear in Relation to Their Hardness and Tensile Properties. George L. Norris, 562. Discussion, 568.

Rivet Steel.

Standard Specifications for — for Ships, 148.

Road Materials (see also **Paving Mixtures).**

Relation between the Tests for the Wearing Qualities of Road-Building Rocks. L. W. Page, 983. Discussion, 993.

Standard Tests for —. Report of Committee D-4, 448. Discussion, 454.

Rocks.

Relation between the Tests for the Wearing Qualities of Road-Building —. L. W. Page, 983. Discussion, 993.

Rolled Wheels.

See **Wheels**.

Rubber.

Standard Specifications for — Products. Report of Committee D-11, 466.

S**Sand.**

Observations on the Testing of —. W. B. Reinke, 797. Discussion, 807.

Screen-Scale Sieves.

— Made to a Fixed Ratio. G. A. Disbro, 1053.

Screw Stock.

Tentative Specifications for Cold-Drawn Steel: Bessemer Automatic —, 191.

Tentative Specifications for Cold-Drawn Steel: Open-hearth Automatic —, 193.

Section.

See Size of Section.

Setting of Cement.

Thermal Activities of Portland Cement during the Period of Setting. Louis N. Beals, Jr., 720. Discussion, 737.

Sewer Pipes.

Standard Specifications and Tests for Clay and Cement —. Report of Committee C-4, 302.

Shipping Containers.

See Containers.

Ships.

Standard Specifications for Rivet Steel for —, 148.

Standard Specifications for Structural Steel for —, 143.

Sieves.

Screen-Scale — Made to a Fixed Ratio. G. A. Disbro, 1053.

Size of Section.

Effect of — on Physical Properties Developed by Heat Treatment. J. H. Nead, 489. Discussion, 525.

Slabs.

Standard Specifications for Blooms, Billets and — for Carbon-Steel Forgings, 166.

Standard Specifications for Electrolytic Copper Wire Bars, Cakes, —, Billets, Ingots and Ingot Bars, 218.

Standard Specifications for Lake Copper Wire Bars, Cakes, —, Billets, Ingots and Ingot Bars, 214.

Tests of Reinforced Concrete — under Concentrated Loading. A. T. Goldbeck, 858. Discussion, 874.

Soya Bean Oils.

Detail Results of Tests of — and Tung Oils. Appendix I, Report of Sub-Committee C of Committee D-1, 355.

Specifications.

Proposed Changes in Present Standard — for Steel. Appendix I, Report of Committee A-1, 67.

Specifications (Continued):

- Proposed Recommended Practice for the Heat Treatment of Case-Hardened Carbon-Steel Objects, 188.
- Proposed Standard Definitions of Terms Used in Paint —, 403.
- Proposed Standard — for Building Brick, 286.
- Proposed Standard — for Lime, 315.
- Proposed Standard — for Paving Brick, 289.
- for Turpentine. Appendix II, Report of Sub-Committee C of Committee D-1, 365.
- Standard — for Blooms, Billets and Slabs for Carbon-Steel Forgings, 166.
- Standard — for Cold-Rolled Steel Axles, 156.
- Standard — for Electrolytic Copper Wire Bars, Cakes, Slabs, Billets, Ingots and Ingot Bars, 218.
- Standard — for Extra-High-Carbon Steel Splice Bars, 139.
- Standard — for High-Carbon Steel Splice Bars, 135.
- Standard — for Lake Copper Wire Bars, Cakes, Slabs, Billets, Ingots and Ingot Bars, 214.
- Standard — for Medium-Carbon Steel Splice Bars, 131.
- Standard — for Rail-Steel Concrete Reinforcement Bars, 153.
- Standard — for Rivet Steel for Ships, 148.
- Standard — for Structural Steel for Ships, 143.
- Standard — for the Purity of Raw Linseed Oil from North American Seed, 399.
- Standard — for Wrought-Iron Plates, 185.
- Standard — for Wrought Solid Carbon-Steel Wheels for Electric Railway Service, 160.
- Suggestions as to Standard — to Promote Efficiency and Safety in Explosives Used in Blasting. C. P. Beistle, 1108.
- Tentative — for Cold-Drawn Steel: Bessemer Automatic Screw Stock, 191.
- Tentative — for Cold-Drawn Steel: Open-hearth Automatic Screw Stock, 193.
- The Application of —. Annual Address by the President, Robert W. Hunt, 32.

Spelter.

- Strength of Cast Zinc or —. Gilbert Rigg and G. M. Williams, 669.
- Discussion, 698.

Spherical Bearings.

- Mont Schuyler, 1004.

Splice Bars.

- Standard Specifications for Extra-High-Carbon Steel —, 139.
- Standard Specifications for High-Carbon Steel —, 135.
- Standard Specifications for Medium-Carbon Steel —, 131.

Spring Steel.

- See Steel.

Standard Specifications.

- See Specifications.

Steel.

- Standard Specifications for Wrought Solid Carbon- — Wheels for Electric Railway Service, 160.
- Tentative Specifications for Cold-Drawn — : Bessemer Automatic Screw Stock, 191.
- Tentative Specifications for Cold-Drawn — : Open-hearth Automatic Screw Stock, 193.

Strain Gage.

Use of the — in the Testing of Materials. W. A. Slater and H. F. Moore, 1019. Discussion, 1039.

Structural Materials.

Preservative Coatings for —. Report of Committee D-1, 329.

Structural Steel.

Standard Specifications for — for Ships, 143.

Summary of the Proceedings.

— of the Sixteenth Annual Meeting, 9.

T**Tensile Properties** (see also **Mechanical Properties, Physical Properties**).

Resistance of Steels to Wear in Relation to Their Hardness and —. George L. Norris, 562. Discussion, 568.

Tentative Specifications.

See **Specifications**.

Terms.

Definition of — Used in Specifications. Report of Sub-Committee F of Committee D-1, 402.

Proposed Standard Definitions of — Used in Paint Specifications, 403.

Testing (see also **Methods of Testing, Tests**).

Observations on the — of Sand. W. B. Reinke, 797. Discussion, 807.

Standard Methods of —. Report of Committee E-1, 469.

Study of Bearing Metals and Methods of —. T. D. Lynch, 699. Discussion, 712.

— of Chinese Wood Oil. E. W. Boughton, 923. Discussion, 942.

— of Refractories. A. V. Bleininger, 967.

— of White Paints. Report of Sub-Committee J of Committee D-1, 406.

Use of the Strain Gage in the — of Materials. W. A. Slater and H. F. Moore, 1019. Discussion, 1039.

Testing Machines (see also **Apparatus, Extractor, Sieves**).

Large-Capacity — in United States and England. E. L. Lasier, 996.

Tests (see also **Methods of Testing, Testing**).

Atlantic City Steel Paint —. Report of Sub-Committee D of Committee D-1, 369.

Detail Results of — of Soya Bean Oils and Tung Oils. Appendix I, Report of Sub-Committee C of Committee D-1, 355.

Hardness —. Report of Committee A-10, 196.

Mechanical — of Heat-Treated Spring Steel. R. P. Devries, 550. Discussion, 561.

Outline of a Test for Indicating the Relative Priming and Top-Coat Values of Different Paints. M. McNaughton, 947. Discussions, 954.

Relation between the — for the Wearing Qualities of Road-Building Rocks. L. W. Page, 983. Discussion, 993.

Results Obtained with the Autoclave — for Cement. H. J. Force, 740. Discussion, 751.

Tests (Continued):

- Results of — of Welded Boiler Tubes. E. L. Lasier, 606.
- Standard Specifications and — for Clay and Cement Sewer Pipes. Report of Committee C-4, 302.
- Standard — and Specifications for Drain Tile. Report of Committee C-6, 303.
- Standard — for Road Materials. Report of Committee D-4, 448. Discussion, 454.
- Test of a 40-foot Reinforced Concrete Highway Bridge. D. A. Abrams, 884.
- of Mortars Made from Wisconsin Aggregates. M. O. Withey, 834.
- of Natural Concrete Aggregates. R. S. Greenman, 828.
- of Reinforced Concrete Slabs under Concentrated Loading. A. T. Goldbeck, 858. Discussion, 874.
- on the Rate of Corrosion of Metals. A. W. Carpenter, 617. Discussion, 625.

Thermal Activities.

- of Portland Cement during the Period of Setting. Louis N. Beals, Jr., 720. Discussion, 737.

Tile.

- Standard Tests and Specifications for Drain —. Report of Committee C-6, 303.

Tin.

- Lead- — -Antimony and — -Antimony-Copper Alloys. William Campbell, 630. Discussion, 666.

Top-Coat Values of Paints.

- Outline of a Test for Indicating the Relative Priming and Top-Coat Values of Different Paints. M. McNaughton, 947. Discussion, 954.

Toughness.

- Notes on the Property of — of Metals. Albert F. Shore, 612.

Tubes.

- Results of Tests of Welded Boiler —. E. L. Lasier, 606.

Tung Oils.

- Detail Results of Tests of Soya Bean Oils and —. Appendix I, Report of Sub-Committee C of Committee D-1, 355.

Turpentine.

- Specifications for —. Appendix II, Report of Sub-Committee C of Committee D-1, 365.

V

Vehicles.

- Paint —. Report of Sub-Committee C of Committee D-1, 350.

W

Waterproofing.

- Coal-Tar and Asphalt Products for —. S. T. Wagner, 955. Discussion, 959.
- Materials. Report of Committee D-8, 459.

Wear.

Resistance of Steels to — in Relation to Their Hardness and Tensile Properties. George L. Norris, 562. Discussion, 568.

Wearing Qualities.

Relation between the Tests for the — of Road-Building Rocks. L. W. Page, 983. Discussion, 993.

Welded Boiler Tubes.

See **Boiler Tubes.**

Wheels.

Report of the Investigation of Wrought Steel —, conducted under the Direction of Sub-Committee VII, on Rolled Steel — and Steel Tires, of Committee A-1. Appendix III, Report of Committee A-1, 126.

Standard Specifications for Wrought Solid Carbon-Steel — for Electric Railway Service, 160.

White Paints.

See **Paint.**

Wire.

Standard Specifications for Copper —. Report of Committee B-1, 198. Discussion, 205.

Standard Specifications for Electrolytic Copper — Bars, Cakes, Slabs, Billets, Ingots, and Ingot Bars, 218.

Standard Specifications for Lake Copper — Bars, Cakes, Slabs, Billets, Ingots, and Ingot Bars, 214.

Wisconsin Aggregates.

Tests of Mortars Made from —. M. O. Withey, 834.

Wood Oil.

Testing of Chinese —. E. W. Boughton, 923. Discussion, 942.

Wrought Iron.

Standard Specifications for —. Report of Committee A-2, 183.

Standard Specifications for — Plates, 185.

Wrought Wheels.

See **Wheels.**

Z**Zinc.**

Strength of Cast — or Spelter. Gilbert Rigg and G. M. Williams, 669. Discussion, 698.
